

## A SPA CONCEPT FROM MAURITIUS.

The Seven Colours Spa brand is a creation from the island of Mauritius. Since 2004 we offer treatments, cosmetics and associated products especially designed for this brand in some luxurious spa and well being salons in Mauritius.

The philosophy of SEVEN COLOURS is based on the interaction and balance of life giving energies and colours. Charged with energy, colours are absorbed by our bodies, by our skin, and influence our whole beings, our emotions and our moods.

### **A TAILOR-MADE PROGRAMME**

In order to recognise and respect each client as a unique being characterized by their own dominant energies and with weaker energies needing specific attention, Seven Colours offers clients a consultation on their first visit to the Spa.

A questionnaire dealing with energy and medical issues is part of drawing up an individual tailor-made programme, associating each client with colour treatments specific to their individual needs. Each programme works on rebalancing the energy centres and is carried out in an atmosphere suffused with colours, fragrances and music.

## SEVEN COLOURS TREATMENTS

**Seven Colours Spa offers several treatment regimes:**

**The “Colours Treatments”** focusing on one energy centre (chakra) at a time. These are worked out case by case, treating the needs of the individual client based on the results of their consultation.

**The “Signature Treatments”** are a series of totally original massages. They are complete treatments, acting on all the seven energies during the course of one session.

**The “forfaits”** or contracts are a form of personalised cures developed around a theme. And then there are **original treatments** such as massage for babies, children or pregnant women... initiations into the art of massage or the art of relaxation.

## SEVEN COLOURS COSMETICS

### **The products**

The cosmetics developed by Seven Colours comprise a range of products based on 100% natural essential oils. These products were conceived in collaboration with professional laboratory that develops cosmetics based on natural products using the latest developments in biotechnology.

The essential oils which are potent natural extracts, are concentrated goodness. They are able to penetrate the skin (which is why they are used only when diluted in special solutions), thus acting at the source of any dysfunction, and assisting in repairing, controlling and regenerating.

Through this property, as well as through the wellbeing produced by the combination of their application during a massage and their effect on the sense of smell, they act on the body and spirit simultaneously.

Open daily from 9:00 a.m to 8:00 p.m.
